PROFESSIONAL SUMMARY

Detail-oriented Electronics Engineering student specializing in VLSI Design & Technology with a strong academic foundation (**8.9 CGPA**). Hands-on experience in IC design methodologies using Cadence Virtuoso, digital logic design, and hardware description languages (Verilog, SystemVerilog). Proven technical adaptability through an AI/ML internship at Lenovo, web development roles for IEEE, and embedded systems project prototyping. Strong analytical thinker, collaborative team leader, and proactive problem solver seeking to leverage hardware engineering and chip design expertise.

TECHNICAL SKILLS

- **VLSI & IC Design:** CMOS Fundamentals, VLSI Design, Digital Logic Design, Circuit Analysis, IC Design Fundamentals
- **Hardware Description Languages:** Verilog, SystemVerilog
- **EDA & Simulation Tools:** Cadence Virtuoso
- **Core Electronics:** Digital Electronics, Analog Electronics, Semiconductor Devices, Microprocessors & Microcontrollers
- **Programming Languages:** C, C++, Python
- **Embedded Systems:** 8051 Microcontroller, Arduino, Assembly Language
- **Development Tools:** Git, GitHub, VS Code
- **Soft Skills:** Leadership, Team Collaboration, Technical Communication, Problem Solving

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern 2025 (2 Months)
Lenovo (Hybrid)

- Acquired practical experience in Artificial Intelligence and Machine Learning fundamentals, exploring core concepts including supervised learning, regression, and clustering algorithms
- Implemented data preprocessing and exploratory data analysis (EDA) techniques to handle datasets, improving analytical and troubleshooting methodologies
- Completed AI/ML-based assignments and practical projects, demonstrating strong engineering problem-solving and algorithmic implementation skills

PROJECTS

Footstep Energy Generation Using Piezoelectric Sensors *Piezoelectric Sensors, Embedded Systems*

- Designed and built an end-to-end prototype that harvests kinetic mechanical energy from footsteps and converts it to regulated electrical energy using piezoelectric sensors
- Configured energy storage circuits and analyzed low-power applications to establish efficient power management for sustainable IoT devices

Third Eye Smart Navigation System *Arduino, Ultrasonic Sensors, Embedded Systems*

- Engineered an assistive navigation system utilizing Arduino microcontrollers and ultrasonic sensors to detect obstacles in real-time
- Integrated synchronous buzzer and haptic vibration alert mechanisms to provide intuitive, low-latency feedback for visually impaired users

EDUCATION

B.E. Electronics Engineering — VLSI Design and Technology 2024–2028
Goa College of Engineering, Goa University **CGPA: 8.9**

Higher Secondary School Certificate (XII) 2023–2024
Fr. Agnel Multipurpose Higher Secondary School **74%**

Secondary School Certificate (X) 2021–2022
Fr. Agnel Multipurpose High School **94%**

POSITION OF RESPONSIBILITY

Executive Webmaster & Event Coordinator 2026–Present
IEEE Student Branch — Goa College of Engineering

- Coordinate the planning, communication, and technical infrastructure for college-wide IEEE events, workshops, and hackathons
- Collaborate with student council members and academic advisors to promote IEEE initiatives, boosting student registration and active event participation
- Leverage leadership, public communication, and project management skills to lead volunteer groups and organize technical training programs

ACHIEVEMENTS

- **1st Place — Shark Tank, RIT TechTwister** for startup idea presentation and pitching
- **1st Place — Innovibe Project Expo, AITD** for presenting an innovative engineering solution
- **2nd Place — Inceptions Ideathon, NIT Goa** for innovative problem-solving and idea presentation
- **Winner — Lenovo Leap Hackathon** for innovation and technical problem-solving
